

## ITW Buildex

### Typical Performance Parameters

2021

**Product Name: Electro Zinc Plating**

**Description:**

Electro Zinc is a coating of zinc electrodeposited onto steel fasteners to protect them from corrosion. Electro-coating provides complete coverage of all exposed surfaces with excellent film thickness uniformity. This process conforms to the requirements in specification ASTM B633.

**Chemical Identification:**

Electro Zinc

**Color:**

Silver

**Typical Film Properties:**

Humidity Resistance

Good

Impact Resistance

Excellent

Mar/Chip resistance

Excellent

Abrasion/Shear Resistance

Excellent

**Fastener:**

Teks

**Test Method:**

Salt Spray, ASTM B117

48 Hours -5% or less red rust
