Typical Performance Parameters

2021

Product Name: White UltraShield

Description:

White UltraShield is a high quality thermo-set coating. White UltraShield is uniquely formulated to react and form a complete long life protection to provide the optimum in corrosion resistance properties. White UltraShield is self sacrificing to the base substrate if penetrated or damaged. Fasteners coated with White UltraShield exhibit excellent resistance to most forms of abrasion and torque.

Chemical Identification: Organometallic Polymer

Color: White

Cure: Thermoset

Typical Film Properties:

Humidity Resistance	Excellent
Solvent Resistance	Excellent
Impact Resistance	Excellent
UV Resistance	Excellent

Fastener: Tapcon

Base Treatment: Electro Zinc (ASTM B633)

Film White UltraShield (Acrylic)

Test Method: Salt Spray, ASTM B117
1500hours – NO RED RUST!
