BUILDING IDEAS THAT WORK®

DrivTru™

HWH Socket System

Innovative design improves self-drilling fastener installation

[View this page in PDF format](#)

Applications

-  All 5/16" across flats hex washer head fasteners.
-  All 1/4" across flats hex washer head fasteners.
-  All 3/8" across flats hex washer head fasteners.

Product Features

-  Heavy duty magnet that improves fastener retention, reduces wobble and fastener drop rate.
-  Internal lobular design improves paint adhesion, reduces wobble and increases socket life.
-  5/16" hex washer head across flats size fulfills 80% of the self-drilling fastener requirements.
-  2-9/16" length for extended reach applications.
-  Prevents rounding of fastener head and easier to turn rounded or stripped hex washer head fasteners.
-  Made of shock resistant tool steel and heat treated for maximum strength.
