SELECTOR GUIDE

APPLICATION AND PRODUCT

5	LIGHT DUTY STEEL-TO-STEEL APPLICATIONS • #6, #8, #10, #12, and 1/4 diameter TekS® 1, 2, and 3 drill points • Hex, Pan, and Oval heads	REPORT NO. 02701	
7	MEDIUM DUTY STEEL-TO-STEEL APPLICATIONS • #12 and 1/4 diameter TekS 2 and 3 drill points • Hex head	REPORT NO. 02702	
9	HEAVY DUTY STEEL-TO-STEEL APPLICATIONS • #12, and 1/4 diameter TekS 4, 4.5, and 5 drill points • Hex head	REPORT NO. 02703	
11	LOW PROFILE ARCHITECTURAL APPLICATIONS • #10 and #12 diameter TekS 3 and Type A points • Pancake and Hex heads	REPORT NO. 02704	
13	WOOD-TO-METAL APPLICATIONS • #10, #12, and 1/4 diameter TekS 3 and 4 drill points • Wafer, Phillips flat, and Phillips Square-Driv® heads	REPORT NO. 02705	
15	METAL ROOF AND WALL APPLICATIONS • #10, #12, and 1/4 diameter TekS 1, 2, 3, 4, 4.5 and 5 drill points • Hex with bonded washer	REPORT NO. 02706	
17	PREMIUM METAL ROOF/WALL APPLICATIONS • #10, #12, and 1/4 diameter TekS 1, 2, 3, 4, and 5 drill points • 1/4 and #17 diameter Type AB • Maxiseal® integral washer system	REPORT NO. 02707	
19	LONG LIFE METAL ROOF AND WALL APPLICATIONS • #12 and 1/4 diameter TekS 1, 2, 3, and 5 drill points • 1/4 and #17 diameter Type AB • Scots® 300SS encapsulated head	REPORT NO. 02708	
21	LIGHT DUTY STEEL-TO-STEEL APPLICATIONS • #12, 1/4, and #17 diameter 300 Series Stainless Steel TekS 1, 2, 3, and AB drill points • Hex head	REPORT NO. 090901	
23	LIGHT/MEDIUM DUTY STEEL-TO-STEEL APPLICATIONS • #8, #10, #12, and 1/4 diameter 410 Stainless Steel TekS 2 and 3 drill points • Hex head	REPORT NO. 040101	
25	LIGHT/MEDIUM DUTY STEEL-TO-STEEL APPLICATIONS • #10, #12, and 1/4 diameter 410 Stainless Steel TekS 3 drill point • Hex with bonded washer	REPORT NO. 040102	
27	LIGHT/MEDIUM DUTY STEEL-TO-STEEL APPLICATIONS • #14 diameter Tappers • 304 Stainless Steel/Carbon Steel • Hex with bonded washer	REPORT NO. 040601	

SELECTOR GUIDE

29

HIGH TORQUE ZINC DIE CAST

REPORT NO. 72100

- #12 and 1/4 diameter Tek[®]s 1 and 2 drill points and Type AB
- Maxiseal[®] integral washer system

31

EXTERIOR RIGID INSULATION APPLICATIONS

REPORT NO. 02709

- #12 diameter
- Rigid insulation Tek[®]s 3 drill point
- Maxiseal integral washer system and Scots 300SS encapsulated head

33

METAL-TO-WOOD APPLICATIONS

REPORT NO. 02711

- #9 and #12 diameter, gimlet point #10 and #14 diameter Hi-Lo Type 17 point Trugrip[™] GT
- Hex with or without bonded washer

35

METAL-TO-WOOD APPLICATIONS

REPORT NO. 070101

- #10 Hi-Lo Type 17 and #12 diameter gimlet point Scots Trugrip and HTZ Trugrip

37

FLASHING APPLICATIONS

REPORT NO. 040701

- Dekstrip[™] expandable edged flashing

39

PIPE FLASHING APPLICATIONS

REPORT NO. 02714

- Dektite[®] and Retrofit Dektite[®]
- EPDM and silicone for 1/4" to 18" pipes

41

METAL ROOF END CAP FLASHING APPLICATIONS

REPORT NO. 02715

- Dek-Cap[™] standing seam roof end cap flashing

43

PIPE FLASHING APPLICATIONS

REPORT NO. 02714

- Universal Master Flash[®] and Universal Retrofit Master Flash[®]
- EPDM and silicone for 1/4" to 19" pipes

45

DRYWALL ANCHOR APPLICATIONS

REPORT NO. 02721

- E-Z Ancor[®], Stud Solver[™], Plastic Plus[™], E-Z Toggle[™], E-Z Lite[™], E-Z Mini[®], Twist-N-Lock[™]

47

CEMENT BOARD APPLICATIONS

REPORT NO. 02722

- Hi-Lo[®] and S-12[®] Rock-On[™] screws/Backer-On[™] screws
- Countersinking wafer head

49

EXTERIOR WOOD APPLICATIONS

REPORT NO. 02723

- #6, #7, #8, and #10 diameter Dec-King[™] screws

51

EXTERIOR INSULATED FINISH SYSTEM APPLICATIONS

REPORT NO. 02724

- Gridmate[™] EIFS mechanical fasteners
- Gridmate[™] PB EIFS mechanical fasteners

TEKS® FASTENER FEATURES

HEAD

Proper head style choice will ensure stability during driving, proper clamping and desired finished appearance.

THREAD FORM AND DIAMETER

The correct choice of thread form and diameter optimizes low installation torque with high pullout strength.

PILOT SECTION

The unthreaded portion of the point assures that the drilling of the steel is completed before the threads begin tapping into the drilled hole.

POINT

The point is designed to efficiently remove material and precisely size the hole for the thread.

FINISH: Platings and coatings provide lubricity during drilling and tapping as well as corrosion resistance.

Driv-Tru™ HWH SOCKET SYSTEM

Selector Guide

Part No.	Description	Applications
1591910	Driv-Tru Socket	All 1/4" across flats HWH fasteners
1513910	Driv-Tru Socket	All 5/16" across flats HWH fasteners
1574910	Driv-Tru Socket	All 3/8" across flats HWH fasteners

Warranty Information

Proper fastener connection design takes into account where and how fasteners are used. Allowance for special characteristics in materials, differences in types of materials being joined, unique or unusual environmental service or installation conditions, and the safety factors required by anticipating normal or short term loading conditions must be considered. Due to possible differences in specifications, applications and interpretation of results, purchasers and specifiers must make their own evaluation of the products, to determine the suitability of these products for intended use. All warranties of Buildex products, expressed or implied, including the warranties of mechanability and fitness for particular purposes are specifically excluded except for the following: Buildex will repair or replace any product which, within twelve months after sale by Buildex or its distributors, is found by Buildex to be defective in material or workmanship -- normal wear and tear expected. This is the sole warranty of Buildex and the sole remedy available to distributor or buyer. Buildex shall not be liable for any injury, loss or damage, direct, indirect, incidental or consequential, arising out of the use of, or the inability to use, any Buildex product.

TEKS®

Self-Drilling Fasteners

Preferred most by electrical, decking, HVAC and metal building contractors.

**1/4-14 x 7/8
Teks 1
Now Available
with ABOT™
(Anti-Backout Threadform)**

Applications

- Stitch roof deck and wall panel sidelaps.
- HVAC, electrical trim accessories to steel framing.
- Residential steel frame construction.
- Brick ties to steel framing.
- Track to stud and stud splicing.
- Hat channel to stud.

Product Features

- Sharp convex drill point has precise cutting edges to improve drill performance with less effort.
- Non-walking point provides fast material engagement.
- Unique point to thread design extrudes the metal preventing stripout.
- Point to thread design maximizes pullout performance and minimizes backout.
- Four head styles available to handle various applications.
- Climaseal® finish provides excellent corrosion resistance and lower tapping torque.

Installation Guidelines

- A standard screwgun with a depth sensitive nosepiece should be used to install TekS. For optimal fastener performance, the screwgun should be a minimum of 4 amps and have a RPM range of 0-2500.
- Adjust the screwgun nosepiece to properly seat the fastener.
- New magnetic sockets must be correctly set before use. Remove chip build-up as needed.
- The fastener is fully seated when the head is flush with the work surface.
- Overdriving may result in torsional failure of the fastener or stripout of the substrate.
- The fastener must penetrate beyond the metal structure a minimum of 3 pitches of thread.

TEKS®

Self-Drilling Fasteners

The best point ever for speed and consistency ... optimum for medium duty steel-to-steel applications.

Applications

- Roof deck to steel framing.
- Wall panel to girt.
- Duct work to steel framing.
- Accessories to steel framing.
- Roof clip to steel framing.
- Retrofit framing.
- Commercial overhead steel doors, hinges & latches.

Product Features

- Point has precise cutting edges to improve drill performance with less effort.
- Non-walking point provides fast material engagement.
- Point to thread design maximizes pullout performance and minimizes backout.
- Drills and taps in the broadest range of applications.
- Climaseal® finish provides excellent corrosion resistance and lower tapping torque.

TEKS®

Self-Drilling Fasteners

First in performance!! Over 40 years of consistent drilling.

The original self-drillers for heavy duty applications.

Applications

-  Metal deck to structural steel or bar joist.
-  Clips to structural steel or bar joist.
-  Liner panels to structural steel or bar joist.
-  Accessories to structural steel or bar joist.
-  Longer length fasteners can be used in retrofit clip and sheet applications.

Product Features

-  Unique double fluted point has precise cutting edges to improve drill performance in 1/4" thru 1/2" steel.
-  Engineered for fast drilling and smooth tapping with less effort.
-  Climaseal® finish provides excellent corrosion resistance and lower tapping torque.
-  Attachments up to 7.2" of material including 1/2" steel.
-  1/4 Diameter has notched threads to reduce tapping torque.

Note: Teks fasteners are not categorized as structural bolts. Proper design criteria and strengths must be used for satisfactory application. The values listed are ultimate averages achieved under laboratory conditions and apply to Buildex manufactured fasteners only. Appropriate safety factors should be applied to these values for design purposes.

Installation Guidelines

-  A standard screwgun with a depth sensitive nosepiece should be used to install Teks. For optimal fastener performance, the screwgun should be a minimum of 6 amps and have an RPM range of 0-2500. (Maximum 1800 RPM is recommended for Teks 5 fasteners)
-  Adjust the screwgun nosepiece to properly seat the fastener.
-  New magnetic sockets must be correctly set before use. Remove chip build-up as needed.
-  The fastener is fully seated when the head is flush with the work surface.
-  Overdriving may result in torsional failure of the fastener or stripout of the substrate.
-  The fastener must penetrate beyond the metal structure a minimum of 3 pitches of thread.

TEKS®

Low Profile Architectural Metal Roof Clip Fasteners & Rake Angle Shoulder Tekes

Incorporates the ITW exclusive Phillips Square-Driv® anti-cam-out system.

Applications

Low profile architectural metal roof clips to steel purlin.

Low profile architectural metal roof clips to wood supports.

Product Features

#12 diameter utilizes the Phillips Square-Driv with interlocking components system.

- Keeps the driver securely mated to the fastener during installation.
- Hands-free installation.

Sharp convex drill point has precise cutting edges to improve drill performance with less effort.

Low profile pancake head style ensures proper installation of metal roof panels.

#10 Diameter uses the coated Phillips drive system providing improved driver bit to fastener stability and friction fit.

Installation Guidelines

- A standard screwgun with a depth-sensitive nosepiece should be used to install Tekes. For optimal fastener performance, the screwgun should be a minimum of 6 amps and have an RPM range of 0-2500.
- Adjust the screwgun nosepiece to properly seat the fastener.
- The fastener is fully seated when the head is flush with the work surface.
- Overdriving may result in torsional failure of the fastener or stripout of the substrate.
- The fastener must penetrate a minimum of 3 pitches of thread beyond the metal structure.
- New magnetic sockets must be correctly set before use. Remove chip build-up as needed.

Wood-to-Metal Fasteners

No pre-drilling, fast, efficient attachment of wood to steel.

Applications

Plywood roof and floor sheet to steel frames.

Plywood fascia to steel frames.

Product Features

Point has precise cutting edges to improve drill performance with less effort.

Flat head design countersinks and seats flush in wood.

Special winged fasteners ream a hole in wood preventing thread engagement during drilling.

Gray Spex™ finish provides excellent corrosion resistance and lower tapping torque.

Wafer head design has a large bearing surface ideal for plywood.

Compatible with ACQ treated wood.

Self-Drilling Fasteners With Bonded Washer

For weather-tight sealing of roof and wall applications.

**1/4-14 x 7/8
Teks 1
Now Available
with ABOT™
(Anti-Backout Threadform)**

Applications

- Roof panels to purlin or bar joist
- Wall panels to girt
- Mansard panel to structural

Product Features

- Vulcanized bonding of washer eliminates separation of EPDM from the metal backing.
- Dual sealing bonded washer prevents leaks.
- Climaseal® finish provides excellent corrosion resistance and lower tapping torque.
- Point has precise cutting edges to improve drill performance with less effort.
- Point to thread design maximizes pullout performance and minimizes backout.

	5	-	-	-	-	-	1597	2005	2350	2792	3310

The values listed are ultimate averages achieved under laboratory conditions and apply to Buildex manufactured fasteners only. Appropriate safety factors should be applied to these values for design purposes.

Installation Guidelines

- Adjust the screwgun nosepiece to properly seat the fastener.
- Overdriving may result in torsional failure of the fastener or stripout of the substrate.
- The fastener must penetrate beyond the metal structure a minimum of 3 pitches of thread.

MAXISEAL®

Integral Washer System

Maxiseal ... The premium sealing system for Teks® self-drilling, self-tapping fasteners.

**1/4-14 x 7/8
Teks 1
Now Available
with ABOT™
(Anti-Backout Threadform)**

Applications

-  Roof panel to purlin and wall panel to girt.
-  Stitching roof, wall, fascia, eave panels or gutter straps.
-  Roof and wall panel or accessories over blanket insulation to steel framing.
-  #17 diameter replacement for stripped #12 and 1/4 diameter fasteners.

Product Features

-  Controls the EPDM rubber washer for improved in place appearance and increased washer life.
-  Seals when driven at an angle.
-  Optimum pullover resistance.
-  Hex washer head provides excellent driving stability.
-  Point has precise cutting edges to improve drill performance with less effort.
-  Non-walking point provides fast material engagement.
-  Point to thread design maximizes pullout performance and minimizes backout.
-  Drills and taps in the broadest range of applications.
-  Climaseal® finish provides excellent corrosion resistance and lower tapping torque.

The values listed are ultimate averages achieved under laboratory conditions and apply to Buildex manufactured fasteners only. Appropriate safety factors should be applied to these values for design purposes.

Installation Guidelines

A standard screwgun with a depth sensitive nosepiece should be used to install Teks®. For optimal fastener performance, the screwgun should be a minimum of 6 amps and have an RPM range of 0-2500.

Adjust the screwgun nosepiece to properly seat the fastener.

New magnetic sockets must be correctly set before use. Remove chip build up as needed.

Overdriving may result in torsional failure of the fastener or stripout of the substrate.

The fastener must penetrate beyond the metal structure a minimum of 3 pitches of thread.

The Original Buildex Scots 300 Stainless Steel Encapsulated

Head will never rust EVER!!!

**1/4-14 x 7/8
Tek 1
Now Available
with ABOT™
(Anti-Backout Threadform)**

Applications

- Panel over blanket insulation to steel frame.
- Roof curb to structural steel.
- Standing seam roof system endlaps.
- Stitch roof and wall sidelaps.
- #17 diameter replacement screw for #12 and 1/4 diameter fasteners.

Product Features

- For improved appearance and extra life an integral design controls the EPDM rubber washer.
- Combines 300 series stainless steel exterior with the strength of carbon steel.
- 300 series stainless most preferred for galvalume long life panels.
- Maximum sealing and corrosion protection.
- Point has precise cutting edges to improve drill performance with less effort.
- Non-walking point provides fast material engagement.
- Point to thread design maximizes pullout performance and minimizes backout.
- Drills and taps in the broadest range of applications.

- The fastener must penetrate beyond the metal structure a minimum of 3 pitches of thread.

Properly Seated Washers

410 STAINLESS STEEL TEKS®

Self drilling fasteners for applications requiring extra corrosion protection

Applications

-  Clips to structural steel or bar joist.
-  Duct work to steel framing.
-  Liner panels to structural steel or bar joist.
-  Brick ties to steel framing.
-  Accessories to structural steel or bar joist.
-  HVAC, electrical accessories to steel framing.
-  Longer length fasteners can be used in retrofit clip and sheet applications.

Product Features

-  Engineered for fast drilling and smooth tapping with less effort.
-  410 Stainless Steel for added corrosion protection.
-  Silver Climashield® finish for added protection compared to standard 410 Stainless Steel products.
-  Point to thread design maximizes pullout performance and minimizes backout.

Installation Guidelines

-  A standard screwgun with a depth sensitive nosepiece should be used to install Tekes. For optimal fastener performance, the screwgun should be a minimum of 6 amps and have an RPM range of 0-2500.
-  Adjust the screwgun nosepiece to properly seat the fastener.
-  New magnetic sockets must be correctly set before use. Remove chip build-up as needed.
-  The fastener is fully seated when the head is flush with the work surface.
-  Overdriving may result in torsional failure of the fastener or stripout of the substrate.
-  The fastener must penetrate beyond the metal structure a minimum of 3 pitches of thread.

410 STAINLESS STEEL TEKS®

Self drilling fasteners with bonded washers for applications requiring extra corrosion protection.

Applications

-  Retrofit panels to steel framing.
-  Stitch roof and wall panels.
-  Brick ties to steel framing.
-  Roof panels to purlin or bar joist.
-  Wall panels to girt.
-  Mansard panel to structural.

Product Features

-  Vulcanized bonding of washer eliminates separation of EPDM from the metal backing.
-  Point to thread design maximizes pullout performance and minimizes backout.
-  EPDM bonded washer prevents leaks.
-  410 Stainless Steel for added corrosion protection.
-  Point has precise cutting edges to improve drill performance with less effort.
-  Corrosion resistant finish for added surface rust protection.

1/4	3	-	-	-	930	1442	2100	2584	2650

The values listed are ultimate averages achieved under laboratory conditions and apply to Buildex manufactured fasteners only. Appropriate safety factors should be applied to these values for design purposes.

FASTENER VALUES			
Fastener (dia-tpi)	Tensile (lbs. min.)	Shear (avg. lbs. ult.)	Torque (min. in. lbs.)
8-18	1545	1000	42
10-16	1936	1400	61
12-14	2778	2000	92
1/4-14	4060	2600	150

Installation Guidelines

- A standard screwgun with a depth sensitive nosepiece should be used to install Tekes. For optimal fastener performance, the screwgun should be a minimum of 6 amps and have an RPM range of 0-2500.
- Adjust the screwgun nosepiece to properly seat the fastener.
- New magnetic sockets must be correctly set before use. Remove chip build-up as needed.

- Overdriving may result in torsional failure of the fastener or stripout of the substrate.
- The fastener must penetrate beyond the metal structure a minimum of 3 pitches of thread.

Properly Seated Washers

304 SS & CARBON STEEL TAPPERS

Self tapping fasteners for applications requiring extra corrosion protection.

Applications

-  Clips to structural or bar joist.
-  Longer length fasteners can be used in retrofit clip & sheet applications.
-  Coastal applications. (Stainless Steel Only)
-  Liner panels to structural steel or bar joist.

Product Features

-  304 Stainless Steel for added corrosion protection.
-  Engineered for fast and smooth tapping with less effort.
-  Vulcanized bonding of washer eliminates separation.

HTZ™

High Torque Zinc Die-Cast Long Life Metal Building Tek[®] Fasteners

Buildex HTZ fasteners exhibit the highest torsional head strength in the zinc die cast market... no head failures.

**1/4-14 x 7/8
Tek[®] 1
Now Available
with ABOT™
(Anti-Backout Threadform)**

HIGH TORQUE ZINC DIE CAST

Applications

-  Panel over blanket insulation to steel frame.
-  Stitch roof and wall sidelaps.
-  Standing seam roof system endlaps.

No Mar Radius Head Design

Product Features

-  HTZ Internal Spline provides the strongest torsional values in the industry... no head failures.
-  Zinc aluminum alloy head provides acceptable long life resistance... no red rust.
-  No mar radius head design will not scratch, pierce or damage panels if overdriven.
-  Indented HWH provides excellent socket stability.
-  For improved appearance and extra life an integral design controls the EPDM washer... maximum sealing protection.
-  Non-walking point, fast material engagement.
-  Point-to-thread design maximizes pullout performance and minimizes backout.

Note: Tek screws are not categorized as structural bolts. Proper design criteria and strengths must be used for satisfactory application.

The values listed are ultimate averages achieved under laboratory conditions and apply to Buildex manufactured fasteners only. Appropriate safety factors should be applied to these values for design purposes.

Installation Guidelines

- A standard screwgun with a depth sensitive nosepiece should be used to install Tek screws. For optimal fastener performance, the screwgun should be a minimum of 6 amps and have an RPM range of 0-2500.
- Adjust the screwgun nosepiece to properly seat the fastener.
- New magnetic sockets must be correctly set before use. Remove chip build-up as needed.
- The fastener is fully seated when the head is flush with the work surface.
- The fastener must penetrate beyond the metal structure a minimum of 3 pitches of thread.

TEKS®

Exterior Rigid Insulation Fasteners

The original self-drilling fasteners designed specifically for rigid insulation.

Applications

- Roof and wall panel over rigid insulation to steel framing.
- Roof panel over spacer block and insulation to eave purlin.

Product Features

- Unique rider section stops panel jacking, point burnout and breakage.
- High thread under the head prevents panel stripout.
- Improved in place aesthetics.
- Available in Scots® and Maxiseal® headstyles.
- Maximum pullover performance.
- Excellent driving stability.
- Seals when driven at an angle.
- Fastens the broadest range of insulation thickness.
- Point has precise cutting edges to improve drill performance with less effort.
- Non-walking point provides fast material engagement.
- Point to thread design maximizes pullout performance and minimizes backout.
- Climaseal® finish provides excellent corrosion resistance and lower tapping torque.

Properly Seated Washers

TRUGRIP™

Metal-to-Wood Fasteners

The preferred fastener by the leading post frame builders and manufacturers.

Applications

- Metal roof and wall panel to wood structure.
- Metal panel over insulation to wood structure.
- Stitch metal roof and wall panel.

Product Features

- Non-walking sharp point for fast material engagement.
- EPDM bonded washer prevents leaks.
- Vulcanized bonding of washer eliminates separation of EPDM from the metal backing.
- High hat HWH for driving stability.
- Climaseal® finish provides excellent corrosion resistance and lower tapping torque.

Long Life Post Frame Fasteners

Applications

-  Metal roof and wall panel to wood structure.
-  Metal panel over insulation to wood structure.
-  Stitch metal roof and wall panel.

Product Features

-  Integral washer head design seals even when driven at an angle.
-  300 series stainless head most preferred for galvalume long life panels.
-  #10 Hi-Lo thread has 30% greater pullout than #9 in wood.
-  Climaseal® long life finish resists corrosive elements in wood.
-  A.P.T. point for fast cutting, easier tapping, and pigtail reducing.
-  High-hat HWH for driving stability.

12	210	335	-	-	-

PULLOVER VALUES (average lbs. ultimate)						
Fastener		Steel Gauge				
Dia.		26	24	22	20	18
10	Washed	548	932	1122	1444	1894
12	Washed	587	744	915	993	-

The values listed are ultimate averages achieved under laboratory conditions and apply to Buildex manufactured fasteners only. Appropriate safety factors should be applied to these values for design purposes.

Installation Guidelines

- A standard screwgun with a depth sensitive nosepiece should be used to install Scots TruGrip. For optimal fastener performance, the screwgun should be a minimum of 6 amps and have an RPM range of 0-2500.
- Adjust the screwgun nosepiece to properly seat the fastener.
- New magnetic sockets must be correctly set before use. Remove chip build-up as needed.
- Overdriving may result in torsional failure of the fastener or stripout of the substrate.
- The fastener must penetrate beyond the metal structure a minimum of 3 pitches of thread.

Properly Seated Washers

DEKSTRIP™

Expandable Edged Flashing

Stretches to any shape, seals & stays.

Applications

- Large square & round ducts & penetrations
- Expansion Joints
- Gambrel roof
- Chimneys
- Stepped Roof
- Flash between dissimilar materials
- Skylights
- Dissimilar roof profiles
- Transition wall
- Parapet Flashing

Product Features

- 20 year warranty
- Serpentine edges stretch up to 25% for added length
- Wraps around almost any profile
- Great for large round pipes
- Paintable after installation
- Handles vibration & expansion
- TPE has a continuous service temperature range of -58°F to +240°F

Product Specifications

Material.....Grey TPE

Base Kit Contents

- Dekstrip material
- 1" x 4' Aluminum termination strip
- 3" x 2' Splice tape

Selector Guide

Base Kit Part Number	Description	Weight	Fasteners Needed (1-1/2" o.c.)
4157910	7" x 75'	26 lb.	1200
4155910	9" x 75'	31 lb.	1200
4156910	12" x 75'	38 lb.	1200
4171910	18" x 50'	30 lb.	800

Accessories for Dekstrip

Part #	Description	Used On
1175153	1/4-14 x 1-1/8" Scots® T/1	Metal roof and wall
4172910	.040 x 1" x 4' Aluminum Termination Strip	Terminating/joining ends of Dekstrip
4040910	Sikaflex 201 Polyurethane Sealant	Sealing edges on all surfaces
4178910	3" x 2' Splice tape	

Installation Guidelines

Basic Installation

1. Snap a chalk line to provide a guide for applying sealant.

2. Apply a continuous bead of sealant along chalk line.

3. Position top edge of Dekstrip over seal bead and install Buildex fasteners at 1-1/2" maximum intervals on top edge. Repeat steps 1, 2, and 3 for the bottom edge.

4. Apply additional sealant to both fastened edges for maximum weather-tight sealing.

Splicing

Materials Needed:

- Leather Gloves
- Heat Gun
- 3" x 2' splice tape
- Shears or scissors

1. Apply splice tape to Dekstrip.

2. Position second Dekstrip over tape & press in place.

3. Apply heat and press firmly to seal edges.

Detailed Instructions

1. Cut splice tape (supplied in Dekstrip carton) to the width needed and remove clear film from one side of the tape. Lining up the edges, press the tape firmly onto the Dekstrip to remove air pockets.

2. Remove remaining film from tape. Apply second piece of Dekstrip over tape and press firmly.

3. Apply heat over spliced area for 1-2 minutes while applying firm pressure over entire spliced area to ensure adhesion.

4. Turn material over and repeat step 3.

Joining ends around round pipes

1. Cut splice tape to length, remove film from one side and apply to Dekstrip.

2. Remove film from top of splice tape.

3. Overlap top piece of Dekstrip and press onto tape.

4. Fold termination strip in half, cut to width, and slide over spliced area.

5. Fasten through top of termination strip, Dekstrip, and back of strip with Scots® fasteners or rivets.

6. Apply sealant to all seams.

DEKTITE® AND RETROFIT DEKTITE® Pipe Flashings

The original flexible pipe flashing system with a 20 year warranty.

Applications

- Plumbing, Heating, Air Conditioning, Electrical and Exhaust Vents.

Product Features

- Made of long life, flexible, weatherproof gray EPDM rubber or red silicone.
- Flexible, corrosion resistant aluminum base conforms to any panel configuration.
- EPDM and silicone will not crack or break.
- Pipe diameter markings are clearly indicated for accurate fitting.
- Designed for 1/4" to 18" diameter pipes.
- One piece construction is easy to install.
- Pleated cone adjusts to any roof pitch and allows for complete flexibility.
- EPDM has a continuous service temperature range of -65°F to +250°F.
- Silicone has a continuous service temperature range of -40°F to +350°F.
- Proven resistance to ozone and ultra-violet light.

Product Specifications

Pipe Diameter Ranges.....1/4" to 18" - Dektite
 3/4" to 10" - Retrofit Dektite
 1/4" to 18" - Silicone

Materials.....EPDM - Standard and Retrofit
 Silicone - High Temperature

Dektite Installation Guidelines

STEP 1: Cut Dektite at appropriate pipe diameter marking.

STEP 2: Slide Dektite flashing down over pipe.

STEP 3: Apply sealant on underside of flexible aluminum base.

STEP 4: Press Dektite base into contours of panel configuration.

STEP 5: Fasten Dektite to surface with Buildex Scots® self-drilling fasteners. Apply additional sealant around base if desired.

- Notes:**
- Dektite can be installed over or between the ribs of standard panels.
 - DO NOT** install over SSR or architectural panel seams.
 - Generally no sealant is required where the Dektite collar provides a compression fit around the pipe. However, some metal pipes and flues include a seam which may require a local application of sealant at the point where the Dektite collar crosses the seam.

Part Number	Description	Box Qty
4000910	Diverter Dektite	1

Note: When used on roofs where pitch is steeper than 20 degrees, or when used on deep ribbed profile roof panel (1-1/2" deep corrugation or more), consider using next larger size Dektite that will accommodate the same pipe diameter.

Performance Data

ASTM Method	Test Description	Specification	Test Results
D412	Tensile Strength (min. psi rating)	1450 psi min.	1537 psi
D412	Ultimate Elongation (%)	350 min.	535
D1171	Resistance to Ozone-min. rating	100 (no cracks)	Passed
D673	Heat Aging - 70 hrs. at 212°F		
	• Change in Hardness (points)	± 15 max.	+8
	• Change in Tensile Strength (%)	± 30 max.	-4.7
	• Change in Elongation (%)	± 50 max.	-26

ASTM Method	Test Description	Specification	Test Results
D2137	Low Temperature Brittleness-3 mins. at -40°F	Non-brittle	Passed
D624	Tear Resistance Die C (min.) per inch of width min.	125 pounds per inch of width	130 pounds
U.L. 94	Flame Resistance	U.L. 94 H.B.	Passed

Retrofit Dektite Installation Guidelines

STEP 1: Begin cutting opposite of the mechanical locking jointer. Cut through the jointer with tin snips.

STEP 2: Wrap Retrofit Dektite around the pipe. Engage the top section of the jointer first, then proceed down until jointer is completely engaged.

STEP 3: Crimp jointer tightly, starting at the top by squeezing jointer "fingers" with pliers.

STEP 4: Apply sealant to the underside of the ribbed aluminum base. Press Retrofit Dektite against contours of the panel configuration.

STEP 5: Attach Retrofit Dektite to the panel with SCOTS® self-drilling screws. Screws should be spaced as necessary to avoid gaps between the base and the panel.

STEP 6: Apply additional sealant around the top of the Dektite, near the mechanical locking jointer seam.

Recommended Sealant: Chemseco Sikaflex® sealant, part number 4040910.

DEK-CAP™

Standing Seam Roof End Cap Flashing

The only universal end cap flashing!!

Applications

Product Features

-  Universal design allows use on left and right handed seams.
-  Flexible, corrosion resistant aluminum base conforms to the majority of standing seam roof panels.
-  Pre-formed panel profile shape is designed to reduce installation time.
-  Fastening locations are clearly indicated for accurate installation.
-  Dual underside ridges provide maximum sealing protection.
-  Thermal elastomer material provides excellent resistance to ozone, ultra-violet light and extreme temperatures.
-  Thermal elastomer has a continuous temperature of -40°F to +250°F.
-  Expansion notch provides added installation flexibility.
-  Interior panel stop ensures correct installation position.

Product Specifications

Material.....Thermal Elastomer
 Width.....7-1/4"
 Length.....5-3/4"
 Height.....3-5/16"
 Color.....Gray

E-Z Anchor[®]

Self-Drilling Drywall Anchors

The Original! Fast and easy self-drilling anchors. E-Z Zinc™, E-Z Stud Solver™, E-Z Mini™, E-Z Lite™, E-Z Plastic Plus™, Twist-N-Lock™, and E-Z Toggle™

Applications

-  Electrical Fixtures
-  Thermostats
-  HVAC Fixtures
-  Plumbing Fixtures
-  Bathroom Accessories
-  Shelving and Supports
-  Mirrors
-  Picture Frames
-  Brackets
-  Plaques and Awards
-  Closet Organizers
-  Coat Racks
-  Curtain Rods
-  Signs
-  Bulletin Boards
-  Control Systems
-  Decorative Wall Hangings
-  Office Material Holders
-  Smoke Detectors
-  Clocks
-  Kitchen Accessories
-  Doorbells
-  Telecommunications Equipment
-  Chalk Boards
-  Remote Control Boxes

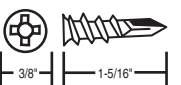

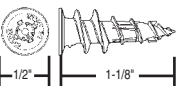

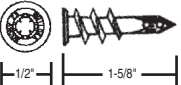

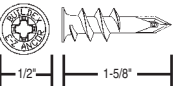

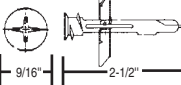

Product Features

-  No hole preparation necessary; pre-drills own small precise hole in gypsum wallboard.
-  Replaces plastic plugs and toggles.
-  Deep thread design provides strong engagement in 3/8", 1/2" and 5/8" gypsum wallboard.
-  Installs quickly and easily with a phillips screw-driver or square drive bit.
-  Full range of anchors to cover all wall fastening applications.
-  Available in corrosion resistant, non-conductive white nylon.
-  Can be easily backed-out.
-  Low profile head.
-  Single point designs for clean cutting installation.
-  Stud Solver - attachments through gypsum and wood! Works in double drywall applications, too!
 - #8 diameter 1-1/4" screws included
 - Bulk packaging only

Product Specifications

Product Material.....Zinc die cast, Carbon, Steel, Nylon

Performance Data

These performance values are averages obtained under laboratory conditions. Note that these values will change depending on age, moisture content and surface treatment of the drywall (gypsum) material. Appropriate safety factors should be applied to these values for design purposes.

DRYWALL THICKNESS	HOLDING WEIGHT		
	3/8"	1/2"	5/8"
Light Duty Plastic	25 lbs.	30 lbs.	40 lbs.
Light Duty Zinc	30 lbs.	40 lbs.	50 lbs.
Medium Duty	40 lbs.	50 lbs.	75 lbs.
Twist-N-Lock	65 lbs.	75 lbs.	80 lbs.
Heavy Duty	70 lbs.	85 lbs.	150 lbs.

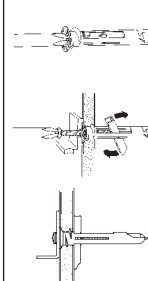

Installation Guidelines

Light Duty & Medium Duty E-Z Ancors

- Place #2 Phillips screwdriver into recess of E-Z Zinc, E-Z Lite, E-Z Mini, E-Z Stud Solver, Twist-N-Lock, or E-Z Plastic Plus.
- Press into drywall while turning the anchor clockwise until it is seated flush with wall.
- Place fixture in position over installed E-Z Zinc, E-Z Lite, E-Z Mini, E-Z Stud Solver, Twist-N-Lock, or Plastic Plus. Insert screw with screw driver. Tighten fixture in place.

Heavy Duty E-Z Toggle

- Using a #2 Phillips screwdriver, drill the E-Z Toggle Anchor into drywall until the head of the anchor is seated flush.
- To "set" the clamp behind the drywall, place the mounting screw into the anchor and push or tap firmly until approximately 1" of screw is protruding (do not rotate). Then remove the screw.
- Place fixture over E-Z Toggle, insert screw and continue to turn until fastened tightly (for example when attaching a 1/2" thick fixture, it will require approx. 23 full rotations of the screwdriver to fully tighten the fixture).

ROCK-ON™

Cement Board Fasteners

High performance rib design is still the best!!!

BACKER-ON™

Fiber Cement Backerboard Fasteners

Recognized for use with HARDIEBACKER® cement backerboard.

Applications

Cement-type boards or any dense sheathings to steel or wood studs.

Wire lath to steel or wood studs.

Plywood to steel or wood studs.

Hardie Fiber Cement Backerboard.

Product Features

Rock-On

- Rib design under head countersinks into dense material while preventing stripouts.
- Two point types for steel and wood applications.
- Larger head diameter increases board surface contact for greater pullover resistance.
- Rock-On is recommended for ACQ treated wood.

Backer-On

- Gimlet points starts easily - no predrilling.
- Serrated thread design provides reduced installation torque and superior holding power.
- Rib design under head countersinks into dense material while preventing stripouts.
- #2 square drive prevents bit from slipping.

Product Specifications

Rock-On

The values listed are ultimate averages achieved under laboratory conditions and apply to Buildex manufactured fasteners only. Appropriate safety factors should be applied to these values for design purposes.

Installation Guidelines

-  A standard screwgun with a depth sensitive nosepiece should be used to install cement board fasteners. For optimal fastener performance, the screwgun should be a minimum of 6 amps and have an RPM range of 0-2500.
-  Adjust the screwgun nosepiece to properly seat the fastener.
-  Worn or damaged bit tips should be replaced.
-  The fastener is fully seated when the head is flush with the work surface.
-  Overdriving may result in torsional failure of the fastener or stripout of the substrate.
-  The fastener must penetrate beyond the metal structure a minimum of 3 pitches of thread.

DEC-KING[®]

Exterior Wood Screws

Corrosion resistant fasteners for exterior wood applications

Applications

-  Decking
-  Base Trim
-  Lattice
-  Ballisters
-  Rail Cap

Product Features

-  Coated with Climacoat[®] for maximum resistance to corrosion, staining and streaking inside the lumber and on the deck.
-  Recommended for ACQ treated wood.
-  Pullout strength is superior over nails.
-  Eliminates wood splitting, nail pops, hammer marks and bent nails.
-  Available in both #2 Phillips & #2 Square Drive.

Product Specifications

- Diameter**.....#6, #7, #8, and #10

GRID-MATE PB™ Mechanical Fasteners

The ultimate fastening system for all Polymer Based (PB) Barrier and Water Managed EIFS.

Applications

Grid-Mate All Polymer Modified (PM) Systems.

- Modified Stucco Systems.
- Expanded lath over rigid insulation.
- Fabric and wire mesh over rigid insulation.
- Attaching rigid insulation to wood, steel, masonry, or concrete.

Grid-Mate PB Attaching expanded polystyrene insulation to all substrates for all Polymer Based (PB) Exterior Insulated Finish Systems (EIFS).

- Attaching dense blanket or rigid insulation for parking garages, fireproofing, foundation walls, and soundproofing.

Product Features

Grid-Mate

- Low profile design seats flush.
- "Keying Window" provides a strong bond with all coatings.
- Climacoat® and Climaseal® fasteners.
- Available with stem for time saving pre-spotting of the plate.

Grid-Mate PB

- Closure fingers keep coating out of contact with fastener head - no sink marks or bleed throughs.
- 2" diameter resists and distributes wind loads for a secure system.
- Climacoat and Climaseal fasteners.

Product Specifications

Grid-Mate

Diameter.....1-3/4" Plate
1-3/4" Plate with stem
Material.....White polypropylene

Part No. 2115900

Part No. 2117900

Grid-Mate PB

Diameter.....2" Round
Material.....White polypropylene

Part No. 2189900

Gridmate Washers

Part Number	Description	Carton Quantity	Carton Weight
2115900	Grid-Mate	1000	4.5 lbs.
2117900	Grid-Mate with Stem	1000	5.0 lbs.

Gridmate PB Washer

Part Number	Description	Carton Quantity	Carton Weight
2189900	Grid-Mate PB Washer	1000	11 lbs.

Fasteners

Wood/Light Metal				Steel Framing			
For use with plywood, OSB, dimensional lumber and light gauge metal (26 gauge - 20 gauge).				For use with steel framing from 20 gauge - 12 gauge.			
Part Number	Description	Carton Qty.	Carton Wgt.	Part Number	Description	Carton Qty.	Carton Wgt.
2311500	7 x 1-5/8"	5000	23	2321500	6 x 1-5/8"	5000	25
2312500	8 x 2"	3500	28	2318500	6 x 2"	3500	28
2313500	8 x 2-1/2"	2500	21	2319500	8 x 2-5/8"	2500	26
2314500	8 x 3"	2000	20	2320500	8 x 3"	2000	24
2315500	8 x 4"	1000	12	2322500	10 x 4"	1000	21
2316500	10 x 5"	500	23	2323500	10 x 5"	500	13

Performance Data Pullout Values (Average lbs. ultimate)

STEEL APPLICATIONS								
Sheet Steel Gauges								
Fastener	26	24	22	20	18	16	14	12
Wood/Light Metal (Hi-Lo®)	129	178	244	277	-	-	-	-
Steel (S-12®)	-	-	-	296	471	679	847	1225

WOOD APPLICATIONS								
Fastener	Plywood			OSB	Lumber (Embedment)			
	1/2"	5/8"	3/4"	1/2"	1/2"	3/4"	1"	1-1/4"
Wood/Light Metal (Hi-Lo)	298	432	633	208	183	304	441	652

The values listed are ultimate averages achieved under laboratory conditions and apply to Buildex manufactured fasteners only. Appropriate safety factors should be applied to these values for design purposes. Wind-load test results also available upon request.

Installation Guidelines

- Use a 0-2500 RPM, 6 amp min. rated screwgun or cordless drill to install fasteners to wood and steel substrates.
- Fasteners must penetrate steel substrates a minimum of 3 pitches of threads.
- Seat Grid-Mate PB washers flush with or maximum 1/16" below insulation surface. Overdriving may damage the washer and insulation.
- Replace worn or damaged bit tips to prevent damage to fastener head and its finish.
- Consult EIFS system manufacturers specifications for appropriate fastener spacing.
