

FOR IMMEDIATE RELEASE

ITASCA, Ill. -- May 15, 2009 – ITW Buildex, a leading manufacturer of commercial construction products, has announced a new addition to the Sammys® product line for fire protection contractors. The latest product, SH-TEK 50, allows 3/8-16 threaded rod to be anchored to structural and tubular steel. The self-drilling non-walking TEKS® point provides fast material engagement into 3/16"-1/2" thick steel. An innovative swivel-head offers design flexibility for end-users to hang plumb in extreme roof pitches (12/12).

The Sammy SH-TEK 50 is UL listed for maximum 4" pipe size vertically (1500 lbs.) and maximum 2½" pipe 45° off vertical (850 lbs.). Visit www.itwbuildex.com or call (800) BUILDEX for additional product information.
